

Pulse Secure VPN Installer Guide for Android Devices

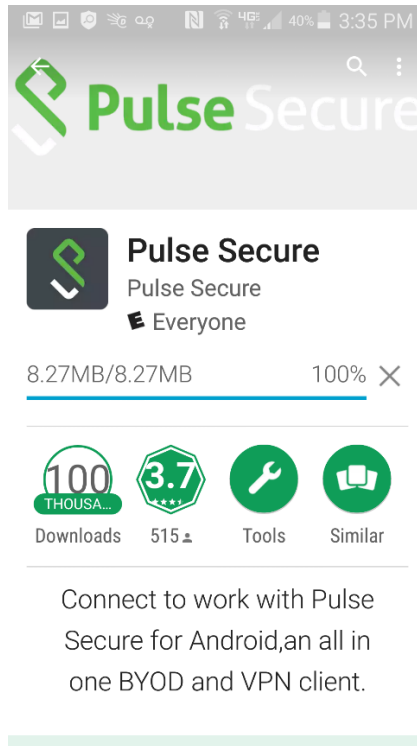

1.) Search for “Pulse Secure” application in the Google Play Store and select the “Install” button.

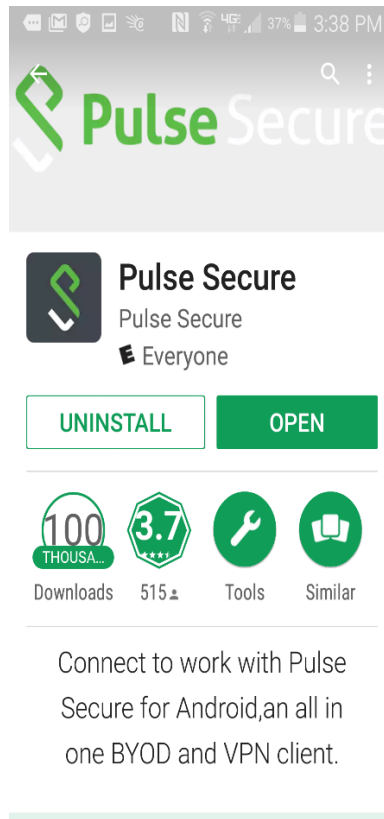

2.) Accept the Google Play Access Agreement Terms.

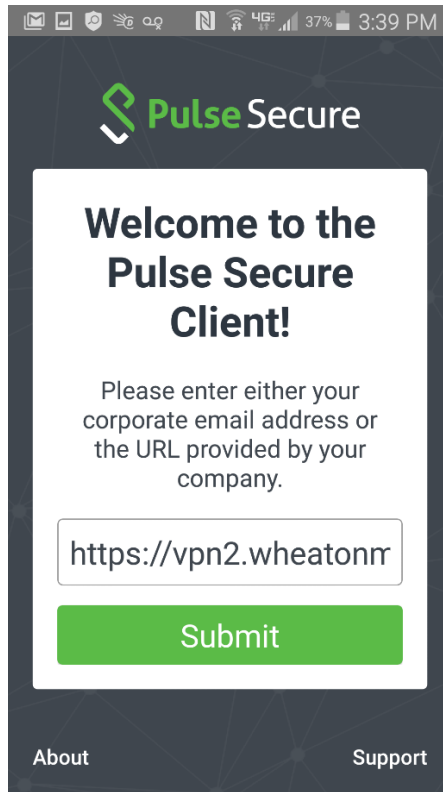

3.) Pulse Secure application should start installing.

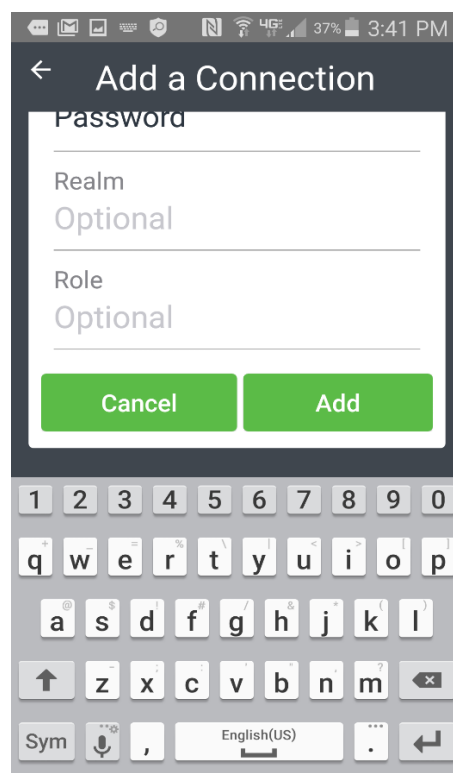

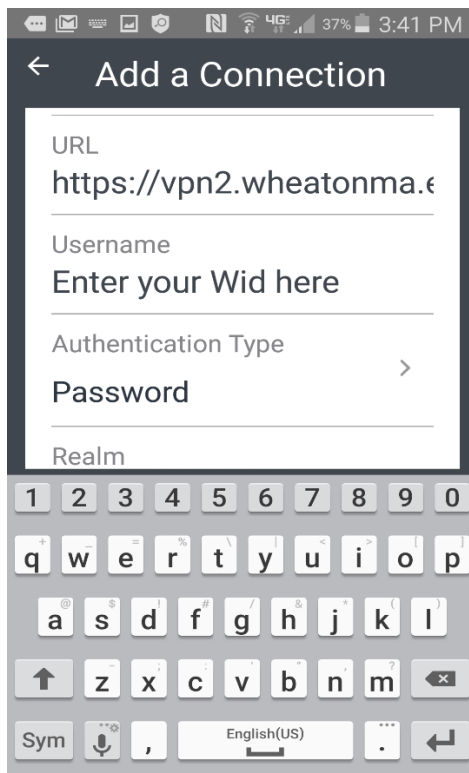

4.) After the installation is complete, select the “OPEN” button.

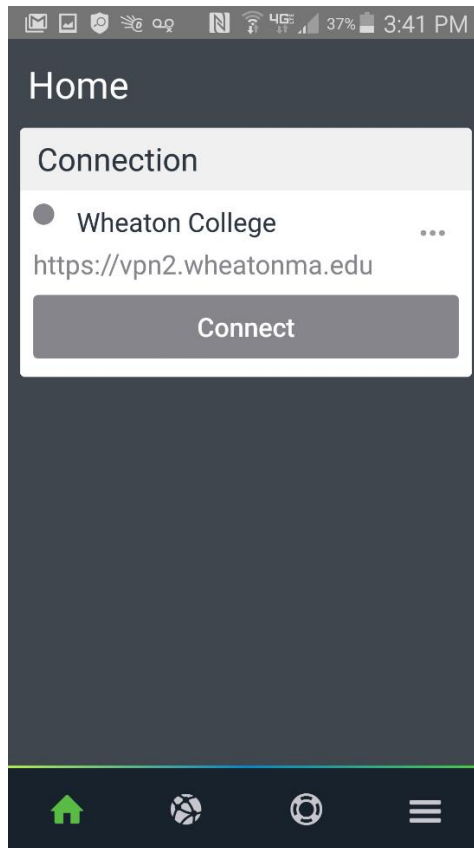

5.) In the box provided, enter in the following address : <https://vpn2.wheatonma.edu> and press select the submit button.

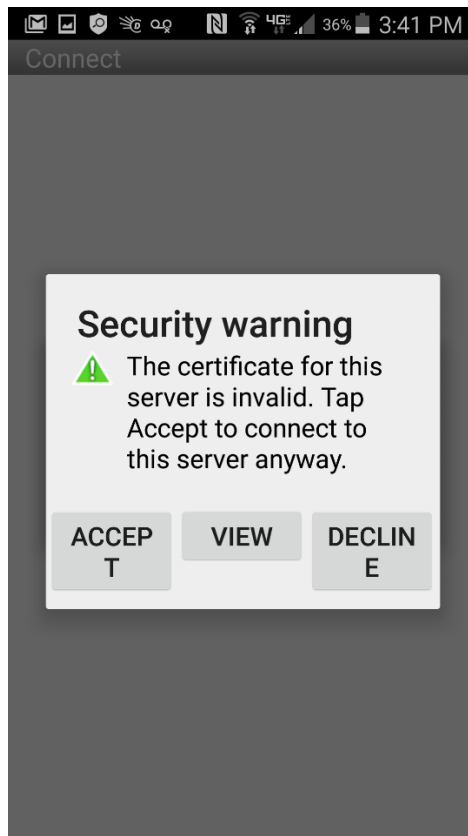

- 6.) In the “Connection Name” field, Enter in “Wheaton College”
- 7.) In the username field enter in your Wid # and select the “Add” button.

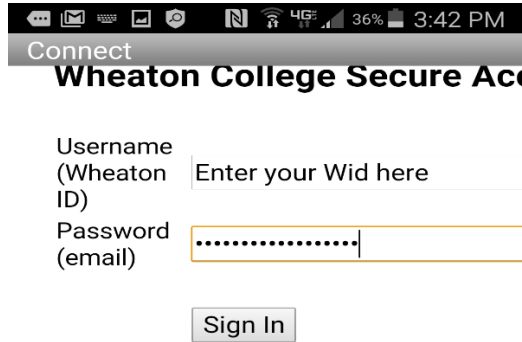

8.) Select the “Connect” button on the connection named “Wheaton College”

9.) If you see a Security Certificate Warning, Select the “Accept” button.

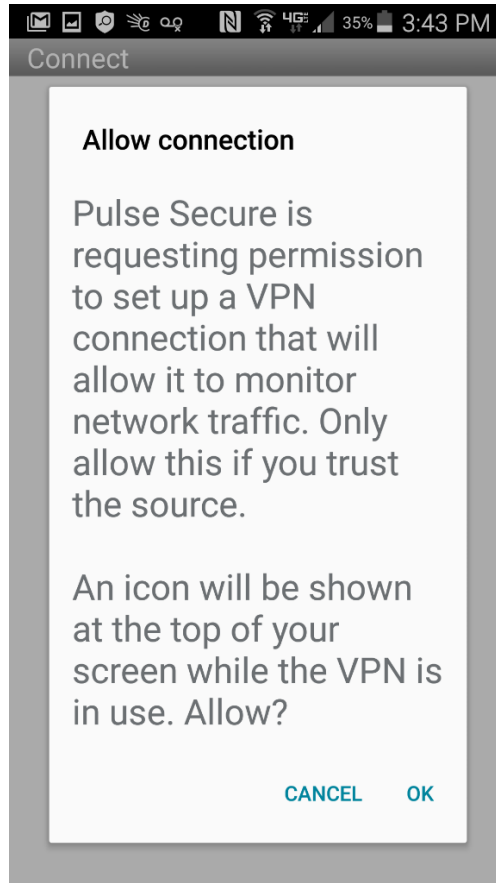

10.) Enter in your Wid# and password and select the “Sign In” Button.

The screenshot shows a mobile application interface for connecting to a secure network. At the top, the status bar displays various icons, signal strength, 4G LTE, 36% battery, and the time 3:42 PM. Below the status bar, the text "Connect" is visible, followed by "Wheaton College Secure Access". The form contains two input fields: "Username (Wheaton ID)" with the placeholder text "Enter your Wid here" and "Password (email)" with a masked password of ten dots. A "Sign In" button is positioned below the password field.

11.) Select the “OK” button to allow the connection.

12.) You should now be connected to the Wheaton College Network through the Pulse Secure VPN Client.
